MONASH SUZHOU SCIENCE and TECHNOLOGY RESEARCH INSTITUTE (MSSTRI)

ADVANCED MANUFACTURING ENGINEERING LECTURER (ADJUNCT) MONASH UNIVERSITY / RESEARCH FELLOW, MONASH SUZHOU SCIENCE AND TECHNOLOGY RESEARCH INSTITUTE

SALARY RATES 330,000RMB – 450,000RMB
WORK LOCATION Suzhou, China
EMPLOYMENT TYPE Full-time
DURATION Continuing appointment
CLASSIFICATION Level B

ORGANISATIONAL CONTEXT
Founded in 1958, Monash University (Monash) has firmly secured its place as a leading global university. At Monash, we give you the space and support to take your career in all kinds of exciting new directions. You’ll have access to quality research, infrastructure and learning facilities, opportunities to collaborate internationally, as well as the grants you’ll need to publish your work. Monash is a university full of energetic and enthusiastic minds, driven to challenge what’s expected, expand what we know, and learn from other inspiring, empowering thinkers. Discover more at www.monash.edu.
Monash is honoured to be the first Australian university to receive a licence to operate in China, one of the world's largest and fastest-growing economies, via the partnership at Suzhou with the Southeast University (SEU), one of China’s key national universities as well as establishment of Monash (Suzhou). The SEU-Monash partnership consists of the Joint Research Institute (JRI) and the Joint Graduate School (JGS), and will produce postgraduates and researchers with ideas to change people’s lives in the region and the world for the better.

The collaboration is based at Suzhou Industrial Park (SIP), which is one of the largest innovation precincts in China and recognised as one of the world’s most dynamic places for converting clever research into valuable industrial processes and products. It is a hub for more than 100 Fortune 500 companies, 480 R&D organisations, as well as 10 national and 28 international higher education institutions.

To facilitate the collaboration Monash established the Monash Suzhou Science and Technology Research Institute (Monash Suzhou Research Institute (MSRI) in short), a not for profit research institute in SIP. MSRI aims to provide a wide range of R&D support to Monash in China in five priority research areas including:

- Advanced computation in science and engineering;
- Advanced materials and manufacturing;
- Energy and environment;
- Future cities; and
- Life sciences

MSRI aims to attract outstanding researchers and high calibre research students. Research in the long term will not be limited only to the above themes; based on the research strengths of SEU and Monash, research in other areas will also be developed and promoted in time. It is the intention to build up a critical mass of researchers at the MSRI and the JRI and strengthen relationships in R&D with local and international industries and other institutions in China.

**POSITION PURPOSE**

A Level B academic is expected to make contributions to the teaching effort of the JGS, and to carry out activities to maintain and develop their scholarly, research and/or professional activities relevant to the particular research theme to which the incumbent is appointed.

Incumbents are expected to take a major role in planning, evaluating, and delivering courses and units in collaboration with the relevant Monash Department or School, and the other academic staff within the MSRI, JRI and JGS. Incumbents are also expected to participate in one of the above research themes in collaboration with Monash academic staff and with other academic staff within the MSRI, JRI and JGS.

This position will support research aligned with the Faculty of Engineering, Monash University and MSSTRI research strategies and strengths, teaching into the Masters of Advanced Materials and Manufacturing, as well as engaging in appropriate service and leadership to the Faculty and Centre according to the position level. Key research areas will focus on structural materials.

**Reporting Line:** This position reports to the Head of the relevant Department or School at Monash for teaching activities performed in the JGS and the Centre Director of the relevant research theme within the MSRI for research related activities

**Supervisory Responsibilities:** The position is required to provide research supervision to junior research staff such as postdoctoral fellows and postgraduate research students

**Financial Delegation:** Not applicable

**Budgetary Responsibilities:** Not applicable
KEY RESPONSIBILITIES

Specific duties required of a Level B academic may include:

1. Initiation and development of subject and course material
2. Preparation and delivery of lectures and seminars
3. Coordination of subjects
4. The conduct of practical classes, demonstrations, workshops, student field excursions, clinical sessions and/or studio sessions
5. The conduct of research either as a member of a team or independently and the production of conference and seminar papers and publications from that research in any of laser machining/welding, solid modelling, computer-aided machining, computer numerical control manufacturing, robotics/automation or closely related topics
6. Contribution to the preparation and, where appropriate, individual preparation of research proposal submissions to external funding bodies
7. Co-supervision and, where appropriate, supervision of postgraduate research projects within the field of the staff member's area of research
8. Supervision of the program of study of postgraduate students engaged in course work
9. Involvement in professional activity
10. Marking and assessment
11. Consultation with students
12. Attendance at departmental, school and/or faculty meetings and/or membership of a number of committees
13. Other duties as directed from time to time

KEY SELECTION CRITERIA

Education/Qualifications

1. The appointee will have:
   ● A doctoral qualification in one of Mechanical Engineering, Manufacturing Engineering, Mechatronics Engineering or a closely related field; or
   ● Demonstrated knowledge and expertise in any of laser machining/welding, solid modelling, computer-aided machining, computer numerical control manufacturing, robotics/automation or closely related topics.

Knowledge and Skills

2. Demonstrated track record of refereed research publications and track record of grant success
3. Demonstrated strong record of teaching experience in a tertiary environment
4. Demonstrated experience in curriculum and subject material development
5. Possess a high level of interpersonal skills and demonstrated ability to work independently and as part of a team across both the education and research domains
6. A demonstrated capacity to work in a collegiate manner with other staff in the workplace
7. Proven ability to mentor and/or provide research guidance to junior researchers
8. Good links with domestic and overseas researchers in relevant research areas
9. Excellent oral and written communication in English with strong written and oral communication in Mandarin desirable

OTHER JOB RELATED INFORMATION

- Travel to other campuses of the University will be required
- There may be a requirement to work additional hours from time to time
- There may be peak periods of work during which taking of leave may be restricted
- Eligible to work in mainland China either as a PRC national or a Non-PRC national with a current and valid employment permit

GOVERNANCE

Monash University expects staff to appropriately balance risk and reward in a manner that is sustainable to its long-term future, contribute to a culture of honesty and integrity, and provide an environment that is safe, secure and inclusive. Ensure you are aware of and adhere to University policies relevant to the duties undertaken and the values of the University. This is a standard which the University sees as the benchmark for all of its activities in Australia and internationally.
