

ABC POSITION DESCRIPTION

Division: <i>Digital Networks</i>	Position Title: <i>Senior Developer(APIs and Backend Services)</i>
Department: <i>Digital Architecture and Development</i>	Classification: <i>Technologist, Band 8</i>
Location: <i>Ultimo</i>	Position No: <i>P443476 / 50036755</i>
Reporting to: <i>Manager, APIs and Backend Services</i>	Approval:
Purpose: The position is for an experienced senior developer to lead the development, maintenance and support of new and existing digital products.	
Key Accountabilities:	
<ol style="list-style-type: none"> 1. Provide superior technical development skills within ABC Digital Network's Technology team, to lead the development of APIs & services in an efficient manner across web based platforms. 2. Lead a technical team in the analysis, design and development of complex, re-usable components and functionality for a broad range of uses across various ABC digital properties. 3. Take accountability for technical documentation, ensuring that all development work undertaken is properly documented and maintainable. 4. Deliver high quality product development within agreed time and budget constraints. 5. Maintain a high level of awareness of best practice in the industry for server side development – particularly in areas such as performance, security, SEO and accessibility. Communicate this to other development team members, helping to ensure best practices are used throughout development teams. 6. Improve the quality of output by contributing to the development of best practices and development standards. 7. Actively promote the ABC values and apply all relevant workplace policies and guidelines. 8. All ABC staff are required to cooperate with any reasonable instruction, procedure or policy relating to safety, and take reasonable care for their own safety and that of other persons who may be affected by their conduct while at work. Additional WHS responsibilities apply to Managers and Supervisors, Divisional Directors and Other Officers 	
Key Capabilities/Qualifications/Experience:	
<ol style="list-style-type: none"> 1. Superior development skills, with demonstrated experience developing complex, secure and high-performance software for a range of platforms and devices at scale. 2. Strong, demonstrated knowledge and experience in assessing, selecting and using modern frameworks and build tools, implementing automated/unit testing, and version control branching, merging and versioning strategies. 3. Qualifications in a computing related field or significant industry experience in web development is essential. 4. Experience with at least one server-side language (e.g. Java, PHP, Python, Go) is essential. 5. Demonstrated excellent verbal and written communication skills with a strong ability to foster an open and creative approach to development that shares ideas, skills and knowledge both within and across teams. 6. Demonstrated experience providing technical leadership within a development team and representing that team in discussions with other areas of the business. 7. Excellent skills in planning and prioritising projects and tasks; delivering with a high attention to detail while working under pressure to tight deadlines. 8. An understanding of and commitment to the ABC's aims, values and workplace policies.
