Purpose

To develop, implement and enhance application systems to meet corporate requirements in line with ABC strategy and objectives.

Key Accountabilities

- Oversee IT resources on projects and lead technical activities related to application implementations and upgrades.
- Deliver detailed complex analysis and technical planning of application aspects for IT projects.
- Produce and effectively communicate high quality, scalable and maintainable system designs.
- Develop and enhance systems to meet business requirements following development standards.
- Undertake substantial unit, system and integration testing to ensure solutions meet agreed requirements.
- Prepare and maintain technical documentation to a consistently high quality.
- Collaborate closely with support teams during transition process to ensure smooth transition providing warranty support services.
- Ensure activities conform within the standard ABC change management processes.
- Actively promote the ABC values and apply all relevant workplace policies and guidelines.

- Cooperate with any reasonable instruction, procedure or policy relating to safety and take reasonable care for your own safety and that of other people who may be affected by your conduct while at work. Additional WHS responsibilities apply to Managers and Supervisors, Team Directors, and other Officers.

Key Capabilities/Qualifications/Experience

1. Relevant tertiary qualifications or demonstrated equivalent skills, knowledge and experience in a computing related field.

2. Excellent design and programming skills in and knowledge of Microsoft technologies, including C#.NET, Web Services, Web APIs, Microsoft SQL Server.

3. Very strong analytical and coordination skills to plan and oversee technical activities on IT projects from initiation to implementation, including systems development, upgrades to existing systems, and integration of vendor systems.

4. Demonstrated experience and knowledge in one or more of the following applications: JavaScript, Angular JS, REACT JS, AWS, Powershell and CI/CD pipelines, SharePoint Forms or Nintex Workflow.

5. Demonstrated high level of initiative, and ability to proactively investigate, analyse, diagnose and solve complex technical problems.

6. Strong written and verbal communication skills, with the ability to liaise and communicate effectively with external vendors, internal clients and colleagues, and convey or translate complex technical information to target audiences.

7. Highly developed organisational skills with a commitment to meeting deadlines, and an understanding of agile development principles.

8. Demonstrated ability to work in a team environment and contribute significantly towards team goals.

9. **ABC Principles**: Demonstrated commitment to the ABC Principles of We are ABC, Straight Talking, People Focused, Accountable and Open & Transparent.

10. **ABC Policies**: Understanding of the relevance and scope of ABC policies and the ABC Principles and a commitment to adhere to these; particularly in relation to complying with health, safety and wellbeing requirements in the workplace and acting in accordance with the ABC Principles.

11. **Diversity and Inclusion**: Ability to communicate effectively and build relationships with people from a range of diverse backgrounds.
