## ROLE CONTEXT

### Primary Objective(s) of role:

The Registered Nurse (RN) will contribute to the delivery of a comprehensive and integrated range of evidenced based, recovery-oriented services across the multi-disciplinary Local Health Network (LHN) Mental Health (MH) service appropriate to the needs of the consumer and the local community. The RN will consolidate knowledge and skills and develop in capability through continuous professional development and experience.

The RN contributes to the delivery of integrated clinical mental health care to consumers across community, acute and rehabilitation service settings and will utilise and develop a combination of preventative, early intervention, therapeutic and evaluative approaches, including individual and family therapeutic approaches, group programs, health promotion and community development programs.

Employees working within this level develop from novice practitioners to a proficient level of professional practice. They consolidate knowledge and skills and develop in capability through continuous professional development and experience. An employee at this level accepts accountability for his or her own standards of nursing/midwifery care and for activities delegated to others.
