POSITION DESCRIPTION

Position Title: Senior Lecturer/Associate Professor in Trusted Cyber Physical Systems
Organisation Unit: School of Information Technology & Electrical Engineering
Position Number: 1201155
Type of Employment: Full-time Continuing
Classification: Academic Level C or Level D

THE UNIVERSITY OF QUEENSLAND

The University of Queensland (UQ) contributes positively to society by engaging in the creation, preservation, transfer and application of knowledge. UQ helps shape the future by bringing together and developing leaders in their fields to inspire the next generation and to advance ideas that benefit the world. UQ strives for the personal and professional success of its students, staff and alumni. For more than a century, we have educated and worked with outstanding people to deliver knowledge leadership for a better world.

UQ ranks in the world's top universities, as measured by several key independent ranking, including the Performance Ranking of Scientific Papers for World Universities (43), the US News Best Global Universities Rankings (52), QS World University Rankings (47), Academic Ranking of World Universities (55), and the Times Higher Education World University Rankings (60). UQ again topped the nation in the prestigious Nature Index and our Life Sciences subject field ranking in the Academic Ranking of World Universities was the highest in Australia at 20.

UQ has an outstanding reputation for the quality of its teachers, its educational programs and employment outcomes for its students. Our students remain at the heart of what we do. The UQ experience – the UQ Advantage – is distinguished by a research enriched curriculum, international collaborations, industry engagement and opportunities that nurture and develop future leaders. UQ has a strong focus on teaching excellence, winning more national teaching excellence awards than any other in the country and attracting the majority of Queensland's highest academic achievers, as well as top interstate and overseas students.

UQ is one of Australia’s Group of Eight, a charter member of edX and a founding member of Universitas 21, an international consortium of leading research-intensive universities.

Our 50,000-plus strong student community includes more than 13,000 postgraduate scholars and more than 12,000 international students from 144 countries, adding to its proud 240,000-plus alumni. The University has about 7,000 academic and professional staff and a $1.8 billion annual operating budget. Its major campuses are at St Lucia, Gatton and Herston, in addition to teaching and research sites around Queensland and Brisbane city. The University has six Faculties and four University-level Institutes. The Institutes, funded by government and industry grants, philanthropy and commercialisation activities, have built scale and focus in research areas in neuroscience, biomolecular and biomedical sciences,
sustainable minerals, bioengineering and nanotechnology, as well as social science research.

UQ has an outstanding track-record in commercialisation of our innovation with major technologies employed across the globe and integral to gross product sales of $11billion+ (see http://uniquest.com.au/our-track-record).

UQ has a rapidly growing record of attracting philanthropic support for its activities and this will be a strategic focus going forward.

School of Information Technology & Electrical Engineering

It is an exciting time to get involved with the School of Information Technology and Electrical Engineering, located on UQ's St. Lucia campus. The School is ramping up its investment in teaching, research and engagement to create an inspiring, diverse and flexible workplace. The direction is backed by a bold, new strategic vision to ensure the School is at the forefront of meaningful research outcomes and pedagogy across its core impact areas of health, data, automation and energy. Boasting strong student enrolments in professionally accredited programs, combined with world-class researchers and facilities, the School is focused on strengthening its position in the global computer science and engineering communities. By attracting the brightest minds and fostering a truly innovative and collaborative work environment, the School will develop global solutions to contemporary issues and mentor the leaders of tomorrow.

Details of the School may be accessed on its website at http://www.itee.uq.edu.au/.

Information for Prospective Staff

Information about life at UQ including staff benefits, relocation and UQ campuses is available at - http://www.uq.edu.au/current-staff/working-at-uq

The University of Queensland Enterprise Agreement outlines the position classification standards for Levels A to E.

The School recognises and values equity and diversity, and encourages applications from any individual who meets the requirements of this position irrespective of gender, sexuality, race, ethnicity, religion, disability, age or other protected attributes. The School strives to provide an inclusive working environment, and along with the University is committed to supporting staff with family and caring responsibilities by providing policies, programs and initiatives to help balance work and family responsibilities.

DUTY STATEMENT

Primary Purpose of Position

The primary purpose of this position is to lead and shape distinctive world-class research activities in Cyber Physical Systems, which is consistent with the School’s emerging focus on trusted, secure, available and reliable systems. The position will focus on one or more areas from Industrial Internet of Things, Wireless Sensor Networks, Embedded Systems, Autonomous Systems, and Robotics, with a particular emphasis on security and availability aspects. Additionally, this position will take a lead role in shaping the future teaching curriculum of the school in the Computer Engineering and Digital Systems areas.
The successful candidate will be an enthusiastic team player and team leader who can collaborate to produce clear research impact in the school’s core areas of health, data, automation and energy.

**Duties**

Duties and responsibilities include, but are not limited to:

**Teaching and Learning**
- Teach into undergraduate and postgraduate courses in Computer Engineering especially in courses in embedded systems, computer systems, digital systems, cybersecurity, or computer networking.
- Supervise students, including coursework and higher degree research students.
- Initiate and develop course material and coordinate courses.
- Provide effective academic advice to students.
- Provide support for other academic staff during absences.
- Provide leadership in developing courses and programs.

**Research**
- Conduct research and publish scholarly papers in high quality refereed international journals, books and conference proceedings.
- Actively seek research funding from internal and external sources including the Commonwealth research granting agencies, the state government and industry.
- Develop a program of fundamental, applied and contract research within the School.
- Develop joint research projects with colleagues and postgraduates.

**Service and Engagement**
- Perform high-level academic service functions in the School.
- Participate in School decision-making and serve on School committees.
- Foster relations with industry, government, professional bodies and the wider community.
- Any other duties as reasonably directed by your supervisor

**Other**

Ensure you are aware of and comply with legislation and University policy relevant to the duties undertaken, including but not exclusive to:
- the University's Code of Conduct
- requirements of the Queensland occupational health and safety (OH&S) legislation and related OH&S responsibilities and procedures developed by the University or Institute/School
• the adoption of sustainable practices in all work activities and compliance with associated legislation and related University sustainability responsibilities and procedures

• requirements of the Education Services for Overseas Students Act 2000, the National Code 2007 and associated legislation, and related responsibilities and procedures developed by the University

Organisational Relationships

The position reports to the Head of the Cyber Physical Systems Group or designated Supervisor.

SELECTION CRITERIA

Essential

• PhD in the area of Electrical Engineering, Computer Engineering, Computer Science or an equivalent discipline.

• Demonstrated track record in Trusted Cyber Physical Systems research, as demonstrated by publications in high-ranking refereed journals and conferences, and ability to propose, lead and manage research projects.

• Demonstrated ability to work collaboratively with colleagues especially in multidisciplinary projects, including the ability to work with end-users of research such as industry partners.

• Ability to coordinate courses, contribute to curriculum development, effectively teach, and supervise research higher degree students in the area of Cyber Physical Systems.

Level D (in addition to those at Level C)

• An established international research profile in Trusted Cyber Physical Systems, including a demonstrated capacity to lead significant teams in externally-funded research projects.

Desirable

• Ability to teach in one or more areas from embedded systems, computer systems, digital systems, cybersecurity and computer networking.

• Demonstrated research impact in the School's core areas of health, data, automation and energy

Seminar

Applicants invited for interview may be expected to present a seminar in conjunction with the selection interview process.

Qualification Verification

An appointment to this position is subject to the verification of the highest academic qualification from the conferring institution.
The University of Queensland values diversity and inclusion.

Applications are particularly encouraged from Aboriginal and Torres Strait Islander peoples. For further information please contact our Australian Indigenous Employment Coordinator at: atsi_recruitment@uq.edu.au

Applications are also encouraged from women.
