POSITION DESCRIPTION

Position Title: Postdoctoral Research Fellow
Organisation Unit: Sustainable Minerals Institute, WH Bryan Mining and Geology Research Centre
Position Number: 3041257
Type of Employment: Fixed term, full time
Classification: Research Academic Level A

THE UNIVERSITY OF QUEENSLAND

The University of Queensland (UQ) contributes positively to society by engaging in the creation, preservation, transfer and application of knowledge. UQ helps shape the future by bringing together and developing leaders in their fields to inspire the next generation and to advance ideas that benefit the world. UQ strives for the personal and professional success of its students, staff and alumni. For more than a century, we have educated and worked with outstanding people to deliver knowledge leadership for a better world.

UQ ranks in the world’s top universities, as measured by several key independent ranking, including the Performance Ranking of Scientific Papers for World Universities (43), the US News Best Global Universities Rankings (52), QS World University Rankings (47), Academic Ranking of World Universities (55), and the Times Higher Education World University Rankings (65). UQ again topped the nation in the prestigious Nature Index and our Life Sciences subject field ranking in the Academic Ranking of World Universities was the highest in Australia at 20.

UQ has an outstanding reputation for the quality of its teachers, its educational programs and employment outcomes for its students. Our students remain at the heart of what we do. The UQ experience – the UQ Advantage – is distinguished by a research enriched curriculum, international collaborations, industry engagement and opportunities that nurture and develop future leaders. UQ has a strong focus on teaching excellence, winning more national teaching excellence awards than any other in the country and attracting the majority of Queensland’s highest academic achievers, as well as top interstate and overseas students.

UQ is one of Australia’s Group of Eight, a charter member of edX and a founding member of Universitas 21, an international consortium of leading research-intensive universities.

Our 50,000-plus strong student community includes more than 13,000 postgraduate scholars and more than 12,000 international students from 144 countries, adding to its proud 240,000-plus alumni. The University has about 7,000 academic and professional staff and a $1.8 billion annual operating budget. Its major campuses are at St Lucia, Gatton and Herston, in addition to teaching and research sites around Queensland and Brisbane city. The University has six Faculties and four University-level Institutes. The Institutes, funded by government and industry grants, philanthropy and commercialisation activities, have built scale and focus in research areas in neuroscience, biomolecular and biomedical sciences,
sustainable minerals, bioengineering and nanotechnology, as well as social science research.

UQ has an outstanding track-record in commercialisation of our innovation with major technologies employed across the globe and integral to gross product sales of $11billion+ (see http://uniquest.com.au/our-track-record).

UQ has a rapidly growing record of attracting philanthropic support for its activities and this will be a strategic focus going forward.

Organisational Environment

One of the UQ’s eight research institutes, the Sustainable Minerals Institute (SMI) consists of some 240 staff and postgraduate students covering the areas of mining and geology, mineral processing, environment and rehabilitation, social responsibility, safety and risk, water and unconventional gas. SMI is industry-focused and consequently works with many leading global resources companies and many small-medium enterprises and suppliers. SMI interacts strongly with governments and community. A priority for SMI is the development of talent and providing an environment for successful and rewarding careers.

SMI was founded in 2001 and since its inception has established a reputation as a unique institution for integrated sustainable development research in the resource sector. SMI is a truly global institute with staff and students from around the world. SMI's people are also diverse in their discipline backgrounds, which range across disciplines including anthropology, geology, soil science, sociology, hydrology, environmental science, engineering and mine management.

The Institute recognises and values equity and diversity, and encourages applications from any individual who meets the requirements of this position irrespective of gender, sexuality, race, ethnicity, religion, disability, age or other protected attributes. SMI strives to provide an inclusive working environment, and along with the University is committed to supporting staff with family and caring responsibilities by providing policies, programs and initiatives to help balance work and family responsibilities.

Information about the Institute may be accessed on the Institute’s web site at http://www.uq.edu.au/smi.

SMI comprises six major research Centres which are organised into pairs:
- SMI's Production Centres are the:
  - WH Bryan Mining and Geology Research Centre
  - Julius Kruttschnitt Mineral Research Centre
- SMI's People Centres are the:
  - Centre for Social Responsibility in Mining
  - Minerals Industry Safety and Health Centre
- SMI's Environment Centres are the:
  - Centre for Mined Land Rehabilitation
  - Centre for Water in the Minerals Industry

The W.H. Bryan Mining and Geology Research Centre (BRC) is one of the six centres of the SMI and was established in 1991. SMI-BRC is known for practical innovation in mass mining and global leadership in deep mine development and operation. It has three complimentary applied research programmes that draw on expertise in geological and mining processes to target more accurate performance predictions for higher capacity mining, quantitative modelling of orebodies including variability and uncertainty for informed decision-making; achieving greater productivity from current mine to mill operations; and growing
institutional capabilities in resource stewardship and advancing the discovery of deep, large
ore bodies.

Information about the Centre may be accessed on their web site at http://www.brc.uq.edu.au

Information for Prospective Staff

Information about life at UQ including staff benefits, relocation and UQ campuses is available at - http://www.uq.edu.au/current-staff/working-at-uq

The University of Queensland Enterprise Agreement outlines the position classification standards for Levels A to E.

DUTY STATEMENT

Primary Purpose of Position

To engage, as a Postdoctoral Research Fellow, in research and teaching that furthers the development of the Institute’s Geometallurgy program, as well as performing research, administrative and other activities associated with the SMI Production centres

The successful appointee will have an important role in the conduct of funded research projects being undertaken by a dynamic multidisciplinary team. The first aim of the fellowship will be to contribute to building the Geometallurgical capability of the WH Bryan Mining and Geology Research Centre in collaboration with the JKMRC. The appointee will participate in existing and new programs aimed at improving the linkages between geological characteristics of orebodies and the prediction of the mining and metallurgical performance. The appointee will draft project reports and working papers and author or co-author academic publications as well as take on some responsibility for project management.

Duties

Duties and responsibilities include, but are not limited to:

Research

- Engage in independent and/or team research program including external funding, and achieve national recognition in the research area
- Contribute to an ongoing program of discovery, applied and contract research in the area of Geometallurgy
- Develop relationships with industry to form research partnerships
- Conducting research to improve the understanding of the linkages between geological characteristics and metallurgical performance, with an emphasis on improved prediction based on new methodologies of mineralogical and textural measurement
- Contributing to the academic and professional profile of the Institute by publishing research papers and presenting at academic and industry conferences
- Preparing research reports, drafting journal articles, and presenting results and research findings to a range of difference audiences – research organisations, industry, government and civil society
- Support and generate other funded projects within BRC and JKMRC
Teaching and Learning

- As a ‘Research focussed’ position there is no formal requirement for undergraduate teaching. However it is encouraged that you actively seek teaching opportunities
- Participate in events to attract postgraduate students to the Institute
- Contribute to supervision of honours and postgraduate students

Industry Liaison

- Represent the University in industry or funding body forums,
- Develop and deliver original presentations to Industry,
- Write reports for Industry and advise on significant Industry issues,
- Produce and deliver educational material for Industry,
- Develop and maintain a relevant industry network.

Service and Engagement

- Perform a range of administrative functions in the Institute,
- Contribute to the processes that enable the academic team to manage the work of the Institute, including participation in Institute and Centre decision-making and serving on Institute committees.
- Foster the Institute’s relations with industry, government departments, professional bodies and the wider community,
- Any other duties as reasonably directed by your supervisor

Other

Ensure you are aware of and comply with legislation and University policy relevant to the duties undertaken, including but not exclusive to:

- the University’s Code of Conduct
- requirements of the Queensland occupational health and safety (OH&S) legislation and related OH&S responsibilities and procedures developed by the University or Institute/School
- the adoption of sustainable practices in all work activities and compliance with associated legislation and related University sustainability responsibilities and procedures
- requirements of the Education Services for Overseas Students Act 2000, the National Code 2007 and associated legislation, and related responsibilities and procedures developed by the University

Organisational Relationships

The position reports to the BRC Total Deposit Knowledge Group Leader, Professor Rick Valenta.
SELECTION CRITERIA

Essential

- PhD in the area of geometallurgy, with specific emphasis on geometallurgical characterisation of ores based on both texture and mineralogy.
- Demonstrated knowledge in geometallurgy, mineral processing, modelling and simulation
- An ability to establish relationships and to represent and promote academic discipline at a university and wider community level, including industry, government and professional bodies
- Evidence of a contribution to research, including working on successful external grant applications
- Ability to work collaboratively with colleagues

Desirable

- Developed industry liaisons and professional contacts
- Experience in liaising and collaborating with external agencies to develop cooperative research initiatives.

Qualification Verification

An appointment to this position is subject to the verification of the highest academic qualification from the conferring institution.

The University of Queensland values diversity and inclusion and actively encourages applications from those who bring diversity to the University. Please refer to the University’s Diversity and Inclusion webpage (http://www.uq.edu.au/equity) for further information and points of contact if you require additional support.

Accessibility requirements and/or adjustments can be directed to the contact person listed in the job advertisement.
