developing a framework for evaluating future data projects addressing or identifying disadvantage, in collaboration with key actors and organisations currently involved in this work within the sector.

- design and facilitating workshops with School of Cybernetics staff, students and stakeholders from data and community sectors in Australia to test emerging insights from the research and design frameworks for future use.
- delivering a final report summarising project outcomes, insights and lessons learned during the research project.

- Undertake high impact collaborative and cross-disciplinary research to contribute to the intellectual agenda of the School.
- Contribute to the teaching and education activities of the School where they intersect with the data and disadvantage project, as appropriate.
- Provide support to the engagement and impact activities of the Institute, with the aim to engage and activate a stakeholder community in academia / industry / start-ups / government / civil society.
- Contribute to all aspects of the operation and intellectual life of the School, College and University.
- Maintain practice and collegiality in all education, research, engagement and impact endeavours undertaken by the 3Ai, College and University.
- Take responsibility for their own workplace health and safety and not wilfully place at risk the health and safety of another person in the workplace.
- Other duties as required consistent with the classification level of the position.
- Comply with all ANU policies and procedures, and in particular those relating to work health and safety and equal opportunity.

Selection Criteria

While candidates should ideally meet all selection criteria, the School of Cybernetics will consider all applications that demonstrate alignment with its mission.

1. A PhD or equivalent professional experience that is relevant to the broad disciplines of cybernetics, data analytics and practice, and/or responding to disadvantage in Australia, with a keen sense of how to connect these areas in a multi-disciplinary research endeavor. An outstanding track record of independent research as evidenced by high impact research outputs in industry and government, or academic, environments.

2. Demonstrated ability to engage with complex research areas to produce succinct, accessible and creative outputs with evidence of impact for their intended audiences.

3. A strong orientation to collaboration, team-based projects and interdisciplinary activities and interests. In particular, evidence of ability and experience in effectively contributing on-going support for philanthropic and industry-academia engagement, collaboration and partnership, including the ability to implement strategies to transform research and education outcomes into commercial or outreach applications.

4. Outstanding communication skills with the ability to inspire a wide range of audiences, including in a cross-disciplinary areas and to foster respectful and productive working relationships with staff, students and colleagues at all levels.

5. Demonstrated high-level organisational skills, self-motivation and use sound judgement in decision making along with the ability to take innovative approaches leading to process improvement in line with strategic goals.

6. A demonstrated high-level understanding of equal opportunity (EO) principles and a commitment to the application of EO policies in a University context.

The ANU conducts background checks on potential employees, and employment in this position is conditional on satisfactory results in accordance with the Background Checking Procedure which sets out the types of checks required by each type of position.
