POSITION DESCRIPTION

Postdoctoral Fellow

Position Level	A
Faculty/Division	Engineering
Position Number	00063648
Original document creation	08/08/ 2024

Position Summary

A **Postdoctoral Fellow (Level A)** is expected to contribute towards the research effort of UNSW and to develop their research expertise through the pursuit of defined projects in the field of blast furnace modelling.

The role of **Postdoctoral Fellow** reports to Prof. Yansong Shen and has no direct reports.

Accountabilities

Specific accountabilities for this role include:

- Contribute independently or as a team member in collaborative research with a focus to enhance the quality of research outcomes in the area of high-temperature experiment of iron ore reduction, biocoke kinetics and slag chemistry.
- Conduct research (as per the norms of the discipline) and/or enable research teams to create scholarly outputs that is recognised by peers.
- Undertake specific research project/s under the guidance of a research leader and contribute to development of research activities in the aforementioned area.
- Assist with the coordination of research activities and actively contribute to research outputs to meet project milestones.

- Contribute to the preparation of research proposal submissions to funding bodies and actively seek collaboration with industry partners as appropriate.
- Support the dissemination of research outcomes through appropriate channels and outlets.
- Undertake discipline-appropriate research activities, e.g. surveys, literature reviews, data gathering and/or recording of results using appropriate research methods.
- Participate in and/or present at conferences and/or workshops relevant to the project as required.
- Assist with the supervision of research students in the research area where required.
- Prepare project quarterly, yearly and final reports.
- Align with and actively demonstrate the [UNSW Values in Action: Our Behaviours](#) and the [UNSW Code of Conduct](#).
- Cooperate with all health and safety policies and procedures of the university and take all reasonable care to ensure that your actions or omissions do not impact on the health and safety of yourself or others.

Skills and Experience

- A PhD in Metallurgical Engineering, Chemical Engineering, Mechanical Engineering or related area, and/or relevant work experience.
- Proven commitment to proactively keeping up to date with discipline knowledge and developments.
- Demonstrated ability to undertake high quality academic research and conduct independent research with limited supervision.
- Demonstrated track record of high-impact publications and conference presentations relative to opportunity.
- Demonstrated ability to work in a team, collaborate across disciplines and build effective relationships.
- Evidence of highly developed interpersonal skills.
- Demonstrated ability to communicate and interact with a diverse range of stakeholders and students.
- An understanding of and commitment to UNSW's aims, objectives and values in action, together with relevant policies and guidelines.
- Knowledge of health and safety responsibilities and commitment to attending relevant health and safety training.

Pre-employment checks required for this position

- Verification of qualifications

About this document

This Position Description outlines the objectives, desired outcomes, key responsibilities, accountabilities, required skills, experience and desired behaviours required to successfully perform the role.

This template is not intended to limit the scope or accountabilities of the position. Characteristics of the position may be altered in accordance with the changing requirements of the role.
