Position Summary

The Research Support Officer will provide a high level of administrative and project support to the Primary Care Cooperative Cancer Clinical Trials Group (PC4) Office and take a responsible role in the maintenance and improvement of the office systems and policies and procedures to ensure its efficient operation. They will also contribute to research activities by providing administrative support to PC4 working groups and networks. The Research Support Officer reports to the PC4 National Manager.

1. Key Responsibilities

- ▶ Provide administrative support to the PC4 Office (ie, records management, minute taking, correspondence, mail outs)
- ▶ Responsible for the management of PC4 budget including payment of invoices on behalf of the PC4 office.
- ▶ Maintain the PC4 media presence by updating and producing new content for the PC4 website, emails and twitter handle.
- ▶ Assist in the coordination of meetings, workshops and conferences
- ▶ Provide administrative support to the PC4 Coordinators' Network and Concept Development Workshops
- ▶ Monitor the progress of PC4 supported research for the PC4 research portfolio.
- ▶ Under broad direction, set-up processes to monitor PC4 outputs and supported research.
- ▶ Conduct library or archival searches for materials relevant to PC4 supported research and prepare bibliographies for use by the PC4 Research Coordinator and National Manager.
- ▶ Process and collate data received from PC4 supported projects into the PC4 required format
- ▶ Contribute to general project administrative tasks
- ▶ Attend and contribute to other meetings, seminars and/or conferences as required.
- ▶ Other duties as directed by supervisor
- ▶ Occupational Health and Safety (OH&S) and Environmental Health and Safety (EH&S) responsibilities as outlined in section 5.

1. Selection Criteria

1.1 ESSENTIAL

- ▶ Tertiary qualification in health sciences, nursing, psychology or related field or an equivalent combination of relevant experience and/or education/training.
- ▶ Highly developed interpersonal, written and verbal communication
- ▶ Highly developed organisational skills, attention to detail and demonstrated ability to meet deadlines and manage competing demands.
- ▶ Proven capacity to work both within a team as well as independently with minimal supervision, within a framework of broad guidelines and procedures and show initiative.
- ▶ Demonstrated high level of computing skills including competency with word processing, spreadsheets, databases, internet and email.

- ▶ Demonstrated experience providing general administration support, research support and creation of summative materials for PC4 milestones and supported research.

1.2 DESIRABLE

- ▶ Demonstrated experience in website CMS and social media coordination.
- ▶ Experience in primary care or clinical research
- ▶ Demonstrated skills in literature reviewing

2. *Special Requirements*

- ▶ This role will require some occasional interstate travel

3. *Job Complexity, Skills, Knowledge*

3.1 LEVEL OF SUPERVISION / INDEPENDENCE

The incumbent shall operate under the supervision of the PC4 Director and the National Manager. The incumbent will undertake related tasks as requested by supervisors and is expected to plan, organise and schedule work independently to ensure that deadlines and agreed outcomes are met. They will be expected to use initiative in prioritising work and solving simple problems. A degree of independence is expected once tasks are mastered. More complex tasks are to be referred to the supervisor.

3.2 PROBLEM SOLVING AND JUDGEMENT

The Research Support Officer is expected to exercise judgement relevant to the responsibilities of the role in performing routine duties and when necessary, refer more complex research work to their supervisor. The incumbent is required to build and manage relationships with a wide range of stakeholders.

3.3 PROFESSIONAL AND ORGANISATIONAL KNOWLEDGE

The incumbent is required to have a sound knowledge of administrative processes and event organisation and is expected to contribute as a team member to strategic planning processes, interpret and implement policy and carry out other duties as required. The incumbent will also contribute to activities related to knowledge exchange including literature reviews, citation alerts and PC4 media presence.

The incumbent must comply with relevant Faculty and University policy and procedures.

3.4 RESOURCE MANAGEMENT

This position will work closely with the National Manager in managing the PC4 budget. The incumbent is required to work collaboratively to ensure these budgets are expended within the University and Cancer Australia guidelines and appropriate documentation is presented to accounts other and other reporting units.

The incumbent will be required to have excellent time management skills and the ability to prioritise tasks to achieve required outcomes.

3.5 BREADTH OF THE POSITION

The position will work within the Department of General Practice. The role will be required to liaise with a wide range of stakeholders including staff across all levels in the Department and the Faculty as well as external researchers and consumers.

4. *Equal Opportunity, Diversity and Inclusion*

The University is an equal opportunity employer and is committed to providing a workplace free from all forms of unlawful discrimination, harassment, bullying, vilification and victimisation. The University makes decisions on employment, promotion and reward on the basis of merit.

The University is committed to all aspects of equal opportunity, diversity and inclusion in the workplace and to providing all staff, students, contractors, honorary appointees, volunteers and visitors with a safe, respectful and rewarding environment free from all forms of unlawful discrimination, harassment, vilification and victimisation. This commitment is set out in the University's People Strategy 2015-2020 and policies that address diversity and inclusion, equal employment opportunity, discrimination, sexual harassment, bullying and appropriate workplace behaviour. All staff are required to comply with all University policies.

The University values diversity because we recognise that the differences in our people's age, race, ethnicity, culture, gender, nationality, sexual orientation, physical ability and background bring richness to our work environment. Consequently, the People Strategy sets out the strategic aim to drive diversity and inclusion across the University to create an environment where the compounding benefits of a diverse workforce are recognised as vital in our continuous desire to strive for excellence and reach the targets of Growing Esteem.

5. *Occupational Health and Safety (OHS)*

All staff are required to take reasonable care for their own health and safety and that of other personnel who may be affected by their conduct.

OHS responsibilities applicable to positions are published at:

<http://safety.unimelb.edu.au/topics/responsibilities/>

These include general staff responsibilities and those additional responsibilities that apply for Managers and Supervisors and other Personnel.

6. Other Information

6.1 PC4 AND THE DEPARTMENT OF GENERAL PRACTICE

PC4 is one of 13 national collaborative cancer clinical trials funded by Cancer Australia which aim to increase research capacity and cancer clinical trials. PC4 focuses on developing trials relating to the role of primary care across the cancer continuum. The PC4 National Office includes a national manager, a research coordinator and a research support officer and sits within the Primary Care Cancer Research Group of the Department of General Practice. The Primary Care Cancer Research Group is located within the University of Melbourne multidisciplinary cancer unit in the Victorian Comprehensive Cancer Centre on Elizabeth Street, Carlton.

The Department of General Practice originated as a unit within the Department of Community Medicine in 1977. It was established as a separate department within the School of Medicine in 2001 and established the Primary Care Research Unit (PCRU) as a centre of excellence in primary care research, research training and knowledge exchange in 2006. With an increased profile within the Melbourne Medical School, the Department has utilised its growing network of general practitioners (GPs) and primary health care providers in the community to ensure that University of Melbourne medical students are provided with quality community based medical education. The Department delivers postgraduate training for primary care nurses, and research training for medical, Honours, Masters and PhD students.

The Department focuses on clinical and health services research and training to achieve its vision through three major research themes. Using clinical data analytics, we explore patient pathways and describe the epidemiology of health and disease in primary care. We are developing a range of risk stratification tools for use within primary care. With a focus on primary care innovation we develop, test and implement simple and complex interventions including digital technologies with an emphasis on co-design and patient centred care. Our work informs evidence for stepped care models and the medical home. Central to our work is understanding the patient and practitioner experience and involving them in identifying the challenges designing and testing solutions. The Department has successful research programs in Cancer; Children and Young People's Health; Diabetes and Cardio-Metabolic Conditions; Mental Health; and Abuse and Violence.

For further information regarding PC4 and the Primary Care Cancer Research Group please visit www.pc4tg.com.au or <http://medicine.unimelb.edu.au/research-groups/general-practice-research/cancer-research-group>

For further information regarding the Department of General Practice please visit www.gp.unimelb.edu.au.

6.2 MELBOURNE MEDICAL SCHOOL

<http://medicine.unimelb.edu.au/>

The Melbourne Medical School (MMS) was established in 1862 and has a substantial international reputation for its leadership in teaching and training, health research, policy and practice. The MMS is committed to working with the communities we serve to improve health and advance health care. We will do this through our teaching, learning, research, clinical care and advocacy.

The MMS is composed of eight clinical departments (General Practice, Medical Education, Medicine and Radiology, Obstetrics and Gynaecology, Paediatrics, Psychiatry, Rural

Health and Surgery) which are embedded within clinical health services throughout metropolitan Melbourne and rural Victoria.

The MMS delivers a suite of health related graduate programs including the Doctor of Medicine (MD), the first professional entry Masters level medical program in Australia. The Melbourne MD delivers a fresh approach to medical training and creates a new benchmark in 21st century medical education.

The MMS is committed to improving the wellbeing of the community through the discovery and application of new knowledge. The research effort of the school is highly collaborative and spans basic to translational research and involves over 800 graduate researchers and 1000 academic staff.

The MMS also actively participates in the public debate and advocacy around key health issues and policy based on our values of commitment, integrity, compassion, respect and service.

6.3 FACULTY OF MEDICINE, DENTISTRY AND HEALTH SCIENCES

www.mdhs.unimelb.edu.au

The Faculty of Medicine, Dentistry & Health Sciences has an enviable research record and is the University of Melbourne's largest faculty in terms of management of financial resources, employment of academic and professional staff, teaching of undergraduate and postgraduate (including research higher degree) students and the conduct of basic and applied research. The Faculty's annual revenue is \$628m with approximately 55% of this income related to research activities.

The Faculty has a student teaching load in excess of 8,500 equivalent full-time students including more than 1,300 research higher degree students. The Faculty has approximately 2,195 staff comprising 642 professional staff and 1,553 research and teaching staff.

The Faculty has appointed Australia's first Associate Dean (Indigenous Development) to lead the development and implementation of the Faculty's Reconciliation Action Plan (RAP), which will be aligned with the broader University – wide plan. To enable the Faculty to improve its Indigenous expertise knowledge base, the Faculty's RAP will address Indigenous employment, Indigenous student recruitment and retention, Indigenous cultural recognition and building partnerships with the Indigenous community as key areas of development.

6.4 THE UNIVERSITY OF MELBOURNE

Established in 1853, the University of Melbourne is a leading international university with a tradition of excellence in teaching and research. The main campus in Parkville is recognised as the hub of Australia's premier knowledge precinct comprising eight hospitals, many leading research institutes and a wide-range of knowledge-based industries. With outstanding performance in international rankings, the University is at the forefront of higher education in the Asia-Pacific region and the world.

The University employs people of outstanding calibre and offers a unique environment where staff are valued and rewarded.

Further information about working at The University of Melbourne is available at <http://about.unimelb.edu.au/careers>.

6.5 GROWING ESTEEM, THE MELBOURNE CURRICULUM AND RESEARCH AT MELBOURNE: ENSURING EXCELLENCE AND IMPACT TO 2025

Growing Esteem describes Melbourne's strategy to achieve its aspiration to be a public-spirited and internationally-engaged institution, highly regarded for making distinctive contributions to society in research and research training, learning and teaching, and engagement. <http://about.unimelb.edu.au/strategy-and-leadership>

The University is at the forefront of Australia's changing higher education system and offers a distinctive model of education known collectively as the Melbourne Curriculum. The new educational model, designed for an outstanding experience for all students, is based on six broad undergraduate programs followed by a graduate professional degree, research higher degree or entry directly into employment. The emphasis on academic breadth as well as disciplinary depth in the new degrees ensures that graduates will have the capacity to succeed in a world where knowledge boundaries are shifting and reforming to create new frontiers and challenges. In moving to the new model, the University is also aligning itself with the best of emerging European and Asian practice and well-established North American traditions.

The University's global aspirations seek to make significant contributions to major social, economic and environmental challenges. Accordingly, the University's research strategy *Research at Melbourne: Ensuring Excellence and Impact to 2025* aspires to a significant advancement in the excellence and impact of its research outputs.

<http://research.unimelb.edu.au/our-research/research-at-melbourne>

The strategy recognises that as a public-spirited, research-intensive institution of the future, the University must strive to make a tangible impact in Australia and the world, working across disciplinary and sectoral boundaries and building deeper and more substantive engagement with industry, collaborators and partners. While cultivating the fundamental enabling disciplines through investigator-driven research, the University has adopted three grand challenges aspiring to solve some of the most difficult problems facing our world in the next century. These Grand Challenges include:

- ▶ Understanding our place and purpose – The place and purpose grand challenge centres on understanding all aspects of our national identity, with a focus on Australia's 'place' in the Asia-Pacific region and the world, and on our 'purpose' or mission to improve all dimensions of the human condition through our research.
- ▶ Fostering health and wellbeing – The health and wellbeing grand challenge focuses on building the scale and breadth of our capabilities in population and global health; on harnessing our contribution to the 'convergence revolution' of biomedical and health research, bringing together the life sciences, engineering and the physical sciences; and on addressing the physical, mental and social aspects of wellbeing by looking beyond the traditional boundaries of biomedicine.
- ▶ Supporting sustainability and resilience – The sustainability and resilience grand challenge addresses the critical issues of climate change, water and food security, sustainable energy and designing resilient cities and regions. In addition to the technical aspects, this grand challenge considers the physical and social functioning of cities, connecting physical phenomena with lessons from our past, and the implications of the technical solutions for economies, living patterns and behaviours.

Essential to tackling these challenges, an outstanding faculty, high performing students, wide collaboration including internationally and deep partnerships with external parties form central components of Research at Melbourne: Ensuring Excellence and Impact to 2025.

6.6 GOVERNANCE

The Vice Chancellor is the Chief Executive Officer of the University and responsible to Council for the good management of the University.

Comprehensive information about the University of Melbourne and its governance structure is available at <http://www.unimelb.edu.au/governance>
