

# RESEARCH FELLOW

DEPARTMENT/UNIT	School of Physics and Astronomy, ARC CoE in Future Low-Energy Electronics Technologies (FLEET)
FACULTY/DIVISION	Faculty of Science
CLASSIFICATION	Level A
WORK LOCATION	Clayton campus

## ORGANISATIONAL CONTEXT

---

Everyone needs a platform to launch a satisfying career. At Monash, we give you the space and support to take your career in all kinds of exciting new directions. You'll have access to quality research, infrastructure and learning facilities, opportunities to collaborate internationally, as well as the grants you'll need to publish your work. We're a university full of energetic and enthusiastic minds, driven to challenge what's expected, expand what we know, and learn from other inspiring, empowering thinkers. Discover more at [www.monash.edu](http://www.monash.edu).

**The Faculty of Science** contributes to the University's goals via research, teaching and partnerships with industry, government and individual supporters. Our five Schools cover a large and diverse range of disciplines in undergraduate and postgraduate courses. Ten Schools from other university faculties contribute to science teaching at all levels, allowing students to choose their studies from physical, biological, biomedical, behavioural, environmental, mathematical and computer sciences. The research in the Faculty of Science is carried out by world-class researchers. Their work spans the theoretical to the applied, contributes to new knowledge and technologies, and challenges how we interact with the world. To learn more about the Faculty of Science, please visit our website: [www.monash.edu/science/](http://www.monash.edu/science/).

**The School of Physics and Astronomy** is a School located within the Faculty of Science. It aims to position itself as one of the top physics and astronomy research and teaching departments in Australia. The School is committed to teaching and research of the highest quality in astronomy, astrophysics, experimental physics, and theoretical physics. We are strongly committed to improving the diversity of our staff and students, and promoting a culture of equality, fairness, respect and openness. In 2015, the School received a Bronze Pleiades Award - Recognising Commitment to Advancing Women in Astronomy. This is an important first step in affirming women within the School, one that we can build upon. Please visit <https://www.monash.edu/science/schools/physics>.

**The ARC CoE in Future Low-Energy Electronics Technologies (FLEET)** is an international innovator in novel electronics technologies. Enabled by the new science of atomically thin materials, FLEET brings together over 40 world-leading experts to develop a new generation of ultra-low power devices. The team is highly interdisciplinary with high-profile researchers from atomic physics, condensed matter physics, materials science, electronics, nanofabrication and atomically thin materials.

With over \$40M investment from the ARC and contributing organisations, FLEET is poised to make significant global impact in the electronics and energy sectors. By building strategic and strong partnerships with Australian and international industry, research institutions and government, FLEET aims to build capacity for advanced electronics research in Australia and train the workforce for the next generation of electronic materials researchers and future semiconductor industry. To learn more about FLEET, please visit our website: [www.fleet.org.au/](http://www.fleet.org.au/).

At FLEET, we are committed to gender equity. Our goal is to achieve at least 30% women researchers and higher degree by research (HDR) students across FLEET. Please visit [www.fleet.org.au/equity/](http://www.fleet.org.au/equity/) to learn more. We are also passionate about building future leaders in the field. All of our early career researchers and HDR students will take part in a comprehensive training program incorporating excellent supervision and professional development. To learn more about benefits of working with us, please visit [www.fleet.org.au/collaborate/](http://www.fleet.org.au/collaborate/).

## POSITION PURPOSE

---

A Level A research-only academic is expected to contribute towards the research effort of the University and to develop their research expertise through the pursuit of defined projects relevant to the particular field of research.

The Research Fellow will conduct research in ultrafast photonics, nonlinear optics, experimental condensed matter physics and nanoscience. The incumbent will investigate ultrafast femtosecond charge dynamics in functional materials by means of pump-probe spectroscopy techniques.

The Research Fellow is expected to publish papers in high-impact journals, present results at major conferences and workshops, and to assist in the supervision of PhD and honours students in the Centre.

FLEET is invested in increasing the representation of women in the physics and materials science fields. Applications from female candidates are highly encouraged.

**Reporting Line:** The position reports to an academic staff member, School of Physics and Astronomy

**Supervisory Responsibilities:** Not applicable

**Financial Delegation:** Not applicable

**Budgetary Responsibilities:** Not applicable

## KEY RESPONSIBILITIES

---

A Level A research only academic shall work with support, guidance and/or direction from staff classified at Level B and above and with an increasing degree of autonomy as the research academic gains in skill and experience.

Specific duties required of a Level A research-only academic may include:

1. Conduct research under limited supervision either as a member of a team or, where appropriate, independently and the production or contribution to the production of conference and seminar papers and publications from that research
2. Involvement in professional activities including, subject to availability of funds, including attendance at conferences and seminars in the field of expertise
3. Contribute at least 20 hours per year towards outreach activities
4. Actively participate in FLEET research, mentoring and professional development programs
5. Attend FLEET workshops, seminars and meetings associated with research or the work of the organisational unit to which the research is connected and/or at departmental, school and/or faculty meetings and/or membership of a limited number of committees
6. Provide advice within the field of the staff member's research to postgraduate students

7. Limited administrative functions primarily connected with the area of research of the academic (e.g., the preparation of competitive grants)
8. Co-supervision of major honours or postgraduate research projects within the field of the staff member's area of research
9. Occasional contributions to supervision/teaching in relation to their research project(s)

## KEY SELECTION CRITERIA

---

### Education/Qualifications

1. The appointee will have:
  - A doctoral qualifications in fields in Physics, Physical Chemistry or Materials Engineering or closely related fields

### Knowledge and Skills

2. A strong background and expertise in ultrafast photonics, nonlinear optics, pump-probe spectroscopy and/or experimental condensed matter physics (particularly surface and nanophysics)
3. A demonstrable record of high-impact, peer-reviewed publications in experimental physics, optics, surface science and/or physical chemistry and materials engineering
4. Demonstrated ability to solve problems through innovative solutions
5. Excellent written communication and verbal communication skills with proven ability to effectively analyse information, communicate the aims and outputs of research projects in a range of formats including formal and informal oral presentations, refereed research papers and reports
6. The ability to work independently in a research environment (with limited supervision) and as part of an interdisciplinary research team
7. Potential to successfully supervise postgraduate research students
8. Potential to attract external research funding, and
9. Willingness to work on multidisciplinary problems and learn new skills.
10. expertise in Ultrafast Photonics, Nonlinear Optics and/or Experimental Condensed Matter Physics, or related fields in Physics, Physical Chemistry or Materials Engineering

## OTHER JOB RELATED INFORMATION

---

- Travel to other campuses of the University may be required
- There may be peak periods of work during which taking of leave may be restricted

## LEGAL COMPLIANCE

---

Ensure you are aware of and adhere to legislation and University policy relevant to the duties undertaken, including: Equal Employment Opportunity, supporting equity and fairness; Occupational Health and Safety, supporting a safe workplace; Conflict of Interest (including Conflict of Interest in Research); Paid Outside Work; Privacy; Research Conduct; and Staff/Student Relationships.
