

MELBOURNE WATER POSITION DESCRIPTION

OFFICIAL

Senior Engineer DSS Development Engineering & Planning Services

REPORTS TO:	DIRECT REPORTS AND TEAM SIZE:
Area Manager, DSS Development Engineering & Planning Services	This role has 0 direct reports
THIS ROLE EXISTS TO: (PURPOSE)	
<p>The Senior land development engineering role regulates and collaborates with the development industry and private landowners in collaboration with internal and external stakeholders to investigate, design, strategically plan and review the Development Services Schemes (DSS) to provide new water assets required to meet the needs of Victoria's Population Growth in line with other, sometimes competing, Strategic Objectives. This role is a key parts of the DSS program, a type of developer-funded Infrastructure Contribution Plan which manages, and quality assures the delivery of land and new assets in Growth areas to enable the development of new jobs and homes for Melbourne, predominantly in Greenfield areas.</p> <p>This role will work closely with other teams across Melbourne Water and with all stakeholders to leverage the DSS Principles to negotiate, determine/make recommendations on complex technical engineering and planning determinations regarding best practice Waterway Design, Flood Resilience, Stormwater Re-use and Quality to ensure the DSS' achieve the highest standard of Integrated Water Management (IWM). The role will involve negotiation, advocacy, influencing and presentation skills, negotiating for the best outcome for the Development Services Scheme portfolio, the specific project and for a livable, sustainable integrated water management future for Melbourne. This role is not one of Policy Formulating or Translation and delivers services with an outcome and performance mindset to deliver the agreed Policy, Guidance, standards and risk framework set by the Business. This includes representing Development Services at governance and industry forums, as well as contributing to (but not being responsible for) development- related strategies, action and implementation plans and designing systems, policies, procedures and other tools to drive the transformational Vision for Service Delivery across the business and the Region.</p> <p>DSS Development Engineering & Planning Services</p> <p>This role is responsible for recommending and determining Civil Engineering Matters and the Statutory Services related to civil development engineering and urban planning approvals (predominantly Development and Subdivisions relating to civil engineering and environmental engineering matters) within the DSS Scheme Areas. This includes including defending those decisions at the Victorian Civil & Administrative Tribunal (VCAT), project management and some financial reporting functions associated with the Assessment and Regulation phase of the DSS.</p> <p>The role is responsible for all types of approval, including the management and quality and accuracy of all Detailed Design Business Needs Indicator assessment (BNIs) for all assets types of \$100m+ project values – being the Project Initiator leading the project from end to end and formation of Legal Agreements to require works and DSS contribution payments for land and works, Pre-Application Advice and Stormwater Management Strategies and supporting SEPHA assessment.</p> <p>This is a general civil / land development engineering role where statutory urban planning and development engineering knowledge is needed to succeed.</p>
