

# **POSITION DESCRIPTION – TEAM MEMBER**

Position Title	Application Developer (D365)	Department	Information Technology
Location	Melbourne or Sydney	Direct/Indirect Reports	Nil
Reports to	Chapter Lead	Date Revised	July 2020
Industrial Instrument	Social Home Care and Disability Services Award		
Job Grade	Job Grade 5	Job Evaluation No:	HRC0008383

### Position Level Descriptor

An individual at the Team Member level is accountable for their own performance and contributes to team performance. People at the Team Member level do not have any people reporting to them on a day to day basis.

## Position Summary

The purpose of the Application Developer (D365) role is to create, develop and support software applications and components that facilitate the achievement of business and client outcomes through the use of process and technology.

The position will need to engage effectively with internal and external stakeholders in the determination of application and component requirements to ensure that solutions and software applications are both fit for purpose and fit for use. This position will also coordinate with the chapter lead, other squad/chapter members and product owners to ensure appropriate testing, training and rollout of solutions.

## Position Responsibilities

### **Key Responsibilities**

- Monitor, troubleshoot and resolve requests logged and backlog items, as well as perform root cause analysis of issues including fixing bugs and defects found in designated products
- Resolve issues in a timely manner in accordance with defined SLAs
- Initiate, plan and execute application maintenance and upgrades
- Implement appropriate monitoring, logging and reporting mechanisms in order to pro-actively identify application issues
- Work closely with their squad and external stakeholders in the determination of application requirements to ensure the solution is fit for purpose
- Undertake analysis and development of applications and code in line with ARC development standards and enterprise/solution architecture to deliver new features and functionality
- Assist in development of user stories, design and technical documentation
- Manage unit testing and integration testing and contribute to strategies to address / correct findings
- Coordinate the release process between non-production environments, as per the platform standard
- Ensure all production changes are performed in accordance with Australian Red Cross Change Management Policy
- Assist the Product Owner and Chapter Lead with identifying opportunities for service improvements.
