

## Team Leader Stormwater Infrastructure

### Position Description

<b>Division</b>	Infrastructure Planning	<b>Department</b>	Drainage, Waterways and Coastal Planning
<b>Reports To</b>	Coordinator Stormwater Engineering	<b>Direct Reports</b>	Yes

### Position Purpose

This position will lead a team providing specialist technical engineering expertise and undertake complex investigations for a range of stormwater infrastructure, drainage, and flood related matters under a number of Capital and Operational programs to meet the needs of the community within the City of Moreton Bay area.

### Responsibilities & Outcomes

As a Team Leader Stormwater Infrastructure and member of the Drainage, Waterways and Coastal Planning department you will:

- Lead the delivery of cross divisional stormwater infrastructure projects under a range of Capital and Operational works programs that address legacy issues, support regional population growth and drive integrated and sustainable outcomes.
- Lead a team of technical specialists providing strategic and expert advice to key stakeholders in line with contemporary best practice and council's policy and strategic business requirements.
- Investigate complex stormwater infrastructure, drainage, and localised flooding problems and prepare and present technical reports and recommendations to ensure project outcomes are met.
- Manage the timely review and provision of expert advice to other Infrastructure Planning departments on stormwater elements of design projects.
- Coordinate and/or undertake design studies into stormwater infrastructure improvement opportunities to support infrastructure projects and long-term strategic planning and growth (including management of specialist consultants).
- Oversee the planning and delivery of stormwater infrastructure projects, including completing the concept/functional and detailed design, preparation of costings and the acquisition of necessary approvals to ensure project outcomes are achieved.
- Develop team capability to drive a high performance, continuous improvement and customer focussed culture.
- Build strong relationships with internal and external stakeholders to ensure stormwater & waterway infrastructure and service delivery outcomes are achieved.

### Our Values

Our values shape the way we behave, how we interact with each other and our customers. They underpin our decision making and are our guiding principles for how we work every day. As a team member you will take individual accountability for demonstrating the values expectations and behaviours in this role.

**SERVICE**
**TEAMWORK**
**INTEGRITY**
**RESPECT**
**SUSTAINABILITY**

## Decision Making

Budget	Responsible for the delivery of a range of projects in the CapEx and OpEx Works program, with a value up to \$10M annually
Delegations	Delegations under the Local Government Act 2009 and as directed and published in Council's Delegation Register

## Knowledge & Experience

- Comprehensive knowledge and experience in stormwater infrastructure management.
- Demonstrated experience leading a small team of technical specialists to drive high performance outcomes.
- Comprehensive experience in stormwater infrastructure planning and design.
- Comprehensive experience in completing complex technical investigation relating to stormwater.
- Strong ability to apply critical thinking, reasoning, evaluation and decision-making skills.
- Demonstrated experience in the preparation and presentation of complex technical reports and recommendations.
- Strong communication skills to meet the needs of a range of internal and external stakeholders.

## Qualifications

- Degree in Civil or Environmental engineering or equivalent.
- Registered Professional Engineer of Queensland (RPEQ).
- Current "C" Class Driver's Licence.
